

Would have been careful if I had awareness in it

would not provide a clarified statement to an consumer

would have given an information alert to handy device

says

FEELS

Useful when automatic process occurs

It has excellent sensitivity with a quick response time

If proper guidelines were provided phishing would have not happened

Provides sensitive information through mobile device

Does wifi to automate the alert info into screen with GSM module

Indicate the leakage and rise an buzzer to avoid disaster

DOES

PAIN

It cannot identify the flammable or inflammable gases

Gives only alarm and LED output

Can't turn off the LPG cylinder

GAIN

Leading faster diffusion of the critical situation

Quick response time and accurate detection of an emergency

Display the warning message via LED screen
